Jaipur, Rajasthan. | +91 8824419104
daiyaakshat4@gmail.com

Summary

Frontend Developer specialising in React.js and Firebase, building scalable, high-performance web applications with modern UI/UX, mobile-first design, and a strong focus on accessibility and security. Portfolio: https://akshatdaiya.github.io/

Experience

CrakCode | IN, Delhi
Front End Developer | 06/2024 - 11/2025

- Architected and optimized a scalable community platform enabling developers and job seekers to create new community groups in under 60 seconds, achieving WhatsApp-level performance standards
- Designed and implemented mobile-first UI/UX with emphasis on performance optimization, accessibility compliance, and cross-device compatibility
- Spearheaded the development of the company's primary revenue-generating feature—Long-Term Mentorship—successfully integrating free trial mechanisms and one-on-one mentorship capabilities
- Continuously drove web performance optimization initiatives and Firebase integration enhancements to improve application speed and reliability
- Implemented Firebase integration enhancements for improved application speed and reliability
- Collaborated with cross-functional teams to ensure seamless integration of new features and enhancements

Global IT Providers | Raj, Jaipur
MERN Stack Developer intern | 03/2023 - 07/2023

- Developed multiple full-stack applications, such as Shopping Carts, User Management Systems, and Parking Systems, using MERN stack technologies
- Implemented end-to-end solutions encompassing frontend interfaces, backend APIs, and database architecture while maintaining high code quality standards
- Collaborated with cross-functional teams to design, develop, and test scalable web applications, contributing to comprehensive software testing protocols
- Utilized MERN stack technologies to create innovative solutions for various projects
- Employed agile methodologies to streamline development processes and enhance project efficiency
- Conducted code reviews and provided constructive feedback to team members to improve code quality and maintain best practices

Projects

1. TaskFlow – **Full-Stack Task Management Application**
   Developed a full-stack task management application using **React, TypeScript, Tailwind CSS, Node.js, GraphQL, Apollo Server, Prisma, and PostgreSQL**. Implemented secure JWT authentication, email verification, Google OAuth, and role-based access control. Built features including task creation, drag-and-drop Kanban boards, filtering, sorting, search, deadlines, comments, and status management. Integrated GraphQL APIs with Apollo Client for efficient data fetching and used Prisma ORM for database management. Designed a responsive and user-friendly interface with modern UI/UX practices to improve productivity and task organization.
2. Developer Community Platform
   Developed a scalable community-driven platform using **React, TypeScript, Firebase, Tailwind CSS, and Redux Toolkit** to support laid-off professionals, freshers, and job seekers. Built features that enable users to create and manage communities in under 60 seconds, share job referrals, career resources, and opportunities, and collaborate within focused groups. Implemented responsive and intuitive user interfaces, efficient state management, and real-time data handling to deliver a seamless experience that helps users stay connected, informed, and job-ready during career transitions.
3. Long-Term Mentorship Platform
   Developed a revenue-generating mentorship platform for CrackCode using **React, Firebase, Framer Motion, and Tailwind CSS** to provide structured one-on-one mentorship experiences. Built features including mentor discovery, free-trial onboarding, and guided mentoring workflows that enable personalized career guidance, skill development, and focused

job preparation. Designed responsive and engaging user interfaces with smooth animations to enhance user experience, increase mentor engagement, and help learners progress toward their career goals.

Skills

HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, TypeScript, ReactJS, Redux, Redux Toolkit, React Router, Framer Motion, Firebase, Node.js, ExpressJS, MongoDB, Git&GitHub, Context API, Custom Hooks, Postman, Chrome DevTools, Vercel, Netlify
